

Proceedings of the Joint Workshop of COST Actions TU0601 and E55

**Ljubljana, Slovenia
21 – 22 September 2009**

Editors

**Jochen Köhler, Harikrishna Narasimhan and
Michael H. Faber**

**COST Action TU0601
Robustness of
Structures**

**COST Action E55
Modelling of the Performance
of Timber Structures**

COST is supported by
the EU RTD Framework Programme

ESF provides the COST Office
through an EC contract

TABLE OF CONTENTS

Theme : Experience

Robustness considerations from failures in two large-span timber roof structures <i>Jørgen Munch-Andersen and Philipp Dietsch</i>	1
Assessment of failure and malfunctions in steel bridges <i>Radu Bancila, Edward Petzek, Rominu Silvia and Oana Ionita</i>	9

Theme : Principles

Definition of robustness and related terms <i>Gerhard Fink, René Steiger and Jochen Köhler</i>	21
Robustness – theoretical framework <i>John D. Sørensen, Enrico Rizzuto and Michael H. Faber</i>	26
Robustness – acceptance criteria <i>Enrico Rizzuto, John D. Sørensen and Inger B. Kroon</i>	34

Theme : Exposures

Probabilistic modelling of exposure conditions <i>Ton Vrouwenvelder</i>	43
Modelling of human error <i>Ton Vrouwenvelder, Milan Holicky and Miroslav Sykora</i>	52
Probabilistic modelling of internal gas explosions <i>Ton Vrouwenvelder and Bernt Leira</i>	62
Water vapour balance in a building – moisture exposure for timber structures <i>Gerhard Fink and Jochen Köhler</i>	81

Theme : Vulnerability

Modelling and analysis <i>Leslaw Kwasniewski, Bassam A. Izzuddin, Miguel Pereira, Carmen Bucur and Marian Gizejowski</i>	87
---	----

Steel structures	99
<i>Ulrike Kuhlmann, Lars Rölle, Bassam A. Izzuddin and Miguel Pereira</i>	
Concrete beams and slabs	109
<i>Geoffrey Decan and Luc Taerwe</i>	
Behaviour and modelling of timber structures with reference to robustness	120
<i>Sven Thelandersson and Daniel Honfi</i>	
Theme : Assessment and implementation	
Robustness of buildings in structural codes	134
<i>Dimitris Diamantidis</i>	
Categorisation and assessment of robustness related provisions in European standards	142
<i>Harikrishna Narasimhan and Michael H. Faber</i>	
System reliability of timber structures – ductility and redundancy	160
<i>Poul H. Kirkegaard, John D. Sørensen and Dean Čizmar</i>	
Robustness design of timber structures – secondary structures	169
<i>Philipp Dietsch</i>	
Improvement of robustness through monitoring and smart materials/devices	176
<i>Sara Casciati and Lucia Faravelli</i>	
Earthquakes and robustness for timber structures	185
<i>Jorge Branco and Luís Neves</i>
